

# GET THE RIGHT TOOL FOR THE JOB

## SCRATCH AWL

A useful tool used in preparation before cutting your leather. This nifty tool will help you score/mark out your leatherwork. Choose from the Osborne 4 Scratch Awl or our Clicker Pointed Awl. Osborne awls are used for saddlery production.

*Key points - Holding panel in position whilst lacing up. Position of skirt alignment whilst blocking seat.*

## 12" MAUN RULER

A durable heavy duty metal ruler listing both inches and centimetres.

The Maun ruler is a vital addition to any leather production workshop.

*Key points - Panel depth & gauge of gusset measurements. The Maun ruler is a must for bridle work offering a perfect straight first cut*

## WING DIVIDERS

Used for marking out leatherwork, stitching, tapering and evening out holes. The screw enables workers to adjust the size of the wing divider and set it to the appropriate distance for the project in hand.

*Also known as a screw compass this handy tool can be used for Pommel measurements and accuracy of component fitted and is a perfect tool for laying out your stitch lines on any construction of saddlery or leather goods work*

## EDGE SHAVE NO 1 & NO 6

Removes the leading edge of the cut leather giving a bevelled clean edge. The gauge of the tool how much of the edge is removed.

## SINGLE HEAD KNIFE

A good all-round knife to have in the workshop. Used for cutting leather as well as skiving. Ideal tool for cutting bridle butts and rein backs.

## RAWHIDE MALLET

A must for all leather workers, this mallet is lightweight but effective in all aspects of daily workshop life. An excellent hammer used for stitch marking and crew punching.

## ABBEY STITCH MARKERS OBLIQUE NO7 (3.85MM)

A useful tool to mark out your holes for stitching. These markers will ensure your stitches are neat, tidy and perfectly set apart.

## CREW PUNCHES ½", 5/8", ¾" & 7/8"

A useful tool for any leather worker's collection. Used for making oblong holes and buckle turns.

All tools are tested for durability offering a clean and efficient cut every time.

*Usage: saddle construction, girth & bridle construction and leather goods.*

## SCREW CREASE

Used for marking out lines on the edge of the leather. This tool is used for decorative purposes. The screw attached adjusts the gauge giving you several width options.

## BONE FOLDER

Whether you're a saddler or leather worker, a bone folder is a must have and will give your leather goods the finished look. Used for polishing the edge of the leather, especially around the buckle turns. For saddlery purposes, the bone folder is used for lacing up and for smoothing out leathers in saddlery construction. This tool is also used for removing creases from the hide in knee roll production.

## TACK HAMMER

An essential tool to tack your leatherwork in place before stitching. The smooth, blunt end of the hammer is ideal to form leather and to drive tacks in hard-to-reach places.

## PLIERS

A handy tool for removing tacks and nails.

## SADDLERS HARNESS NEEDLES - NO 2

Round pointed needles used for hand-stitching leather. Strong and durable.

## DIAMOND POINTED AWL BLADES

Also known as a stitching awl, these blades are used for piercing through your stitch markings

## AWL HANDLE

Quality wooden awl handle. These handles fit harness awl blades and the curved backing awl blades.

Key for all aspects of saddlery and bridle production.

## THREAD

Coats Barbour 18/3 is a reverse twist linen thread suitable for hand sewing and machine sewing. Available on 50g spools and 250g cops.

## BEEES WAX

Used on thread to smooth the fibres down and to increase water resistance.

Ideal for the edging of cut leather also and can be used for waxing unwaxed thread.

## SCISSORS

Excellent scissors for cutting leather, materials and padding.

## LOOP STICKS

Used for blocking up your loops and belt keepers after they have been stitched.

## STRAP CUTTER

A handy tool used for cutting streamline straps. Simply set the strap cutter to the width you want and pull towards you. Our strap cutter can cut straps up to 4" wide.

## STRAP CUTTER BLADES

Pack containing 5 spare cutter blades.

## HOLE PUNCH (ROTARY PUNCH PLIER)

Multi sized hole punch plier offering 6 sizes. Great for punching holes in leather and materials. Heavy duty with a steel frame.

## TALLOW

Mixed with Carborundum powder these two ingredients will help sharpen your tools. Tallow can also be used for sealing the edges of leather.

## CARBORUNDUM POWDER

Mixed with tallow these two ingredients will help sharpen your tools.

## SADDLERS CLAMS

An essential tool for helping saddlers and leather workers stitch their leather. Made from beech wood, these saddlers' clams can be stretched open to accommodate various thicknesses of leather.
